

ERKIN GUNES DINCER

DESIGN ENGINEER | PRODUCT ENGINEER

London, UK | +44 7904 292378 | erkingdincer@gmail.com | gunesdesign.com | [LinkedIn](#)

PROFESSIONAL PROFILE

Engineering Design and Innovation graduate (2:1 BEng) with hands-on experience in CAD, rapid prototyping, FDM additive manufacturing and commercial product development. Co-founded a product-design business generating approximately £6,000-£8,000 in revenue in its first four months, taking products from requirements and concept through CAD, prototyping, physical testing, manufacturing and sale. Combines practical design engineering with supplier, cost and commercial awareness.

TECHNICAL SKILLS

CAD & Product Design: SolidWorks, Blender, SketchUp, 3D modelling, product development, engineering drawings

Prototyping & Manufacturing: FDM 3D printing, DfM, DfAM, rapid prototyping, assembly design, tolerance & fit optimisation

Engineering: Mechanical design, product testing, design optimisation, risk assessment, engineering calculations, sustainable design

Electronics & Programming: Arduino, Raspberry Pi Pico, basic IoT, Python, MicroPython, C# (basic); Adobe Photoshop & Illustrator

PROFESSIONAL EXPERIENCE

SUNFORM | London, UK

Co-Founder / Product Design Engineer | 2026 - Present

- Co-founded a product design and additive manufacturing business, generating approximately £6,000-£8,000 revenue in the first four months through B2B and retail sales.
- Lead the full product development lifecycle from client/customer requirements and CAD modelling through prototyping, FDM optimisation, physical testing and production.
- Delivered custom B2B products, including 3D-printed shirt buttons for a textile company; optimise wall thickness, tolerances, assembly, surface finish, support strategy and print time.

AVOMAN | London, UK

Store Manager / Design Coordinator | Aug 2024 - Present

- Progressed from Shop Assistant to Store Manager, managing daily operations, purchasing, supplier relationships, inventory and up to 8 staff across the role.
- Contributed to team-led growth of approximately 400% since joining, with annual revenue reaching around £650,000; expanded the product range and reduced supplier costs through sourcing and negotiation.
- Led the interior design of the company's second branch using SolidWorks and Blender, developing layout and display solutions around customer flow, space use and brand requirements.
- Developed waste-reduction collaborations with local businesses and produced signage and graphic assets for physical retail use.

SELECTED ENGINEERING PROJECTS

Final Year Project - Sustainable Transport for Timanfaya National Park: Designed a solar-electric shuttle system for a 14 km national-park route, covering vehicle layout, accessibility, battery/energy sizing, PV integration, fleet planning and risk assessment.

EcoStride - Human Motion Energy Harvesting: Developed a knee-mounted energy-harvesting concept through literature research, concept development, multidisciplinary teamwork and technical evaluation.

Telepresence Robot for Hospitals: Contributed to a collaborative telepresence robot concept for remote communication in hospitals through SolidWorks CAD modelling, engineering calculations and technical drawings.

EDUCATION

University of Greenwich, London - BEng (Hons) Engineering Design and Innovation, 2:1 | Graduated 2025

Relevant study: Product Design Engineering, Mechanical Engineering, Engineering Management, Business & Marketing, Sustainable Product Development.

Middle East Technical University (METU / ODTU), Ankara - Mining Engineering, Undergraduate Studies

Completed the English Preparatory Programme before relocating to the United Kingdom to continue undergraduate education.

ADDITIONAL

Languages: Turkish (Native), English (Fluent / C1). **Additional experience:** Freelance Graphic Designer (2023 - Present); Designer, University of Greenwich Engineering Society (2023 - 2025).
